

Space Bandits #1 a review by James Richards

Space Bandits is an amazing comic about women in space that are bandits that turns on everyone. This comic will be out on Wednesday 3rd of July. It was written by Mark Millar and illustrated by Mateo Scalera and has been published by Netflix and Image Comics. I love this comic because the illustrations are very good and the story is exciting.

Mark Millar has written many more comics such as *Ultimate Fantastic Four*, *Ultimate X-Men* and *Superman: Red Son*. The comic *Space Bandits* has lots of twists and turns. The main characters are Cody Blue and Thena Khole, a pair of criminals in space. I like this comic because the anti-heroes are women and they are normally men in this type of story.

The artwork is very detailed and the colours are very vivid. I rate the art 10. I rate the characters 10. I would recommend this for older children because of the violence in it. I would like to see more comics like this.
